# Test Results From Our Device Family... To Your Patient's Healthcare Family

## Remote Home Patient Monitoring

Patients can now instantly send their glucose, blood pressure, and weight results from home straight to their health care team! No computer required. All Infopia diagnostic devices communicate with the Eocene Remote Home Patient Monitoring System to provide accurate, real-time data on a secure telehealth platform.

Next Generation  
Data Transmission Device

- On-demand outcome and adherence reports
- Instantly view and print electronic logbooks
- Automatic alerts for intervention and supply re-orders
- EMR Compatible for seamless network integration
